- Use any IDE of your preference.
- Use JDK 1.8.
- You can use the internet.
- You have 90 mins.

1. Create the required classes to run the following:

To output:

```
SUBMITTED
CLEARED
No such button!
```

2. Write a program to call the following REST api
   (https://alexwohlbruck.github.io/cat-facts/docs/) and save the response in a file.
   Call the facts api specifically.

3. Create a class Person with the following attributes:
   - name
   - age

   Create class Employee of person type withe the following:
   - empId
   - hiringDate (set it to today's date, as date not string)

Run the following:

```java
1  public class App {
       Run | Debug
2      public static void main(String[] args) {
3          Person person = new Person(name: "Mohammed");
4          person.setAge(age: 30); // set your age
5
6          InterviewTest interviewTest = new InterviewTest(); //implement this class as you like
7          if(interviewTest.isSuccess()) {
8              person = new Employee(person);
9          }
10
11         System.out.println(person); // should print name - age (and maybe more)
12
13 }
```
